
FOR IMMEDIATE RELEASE

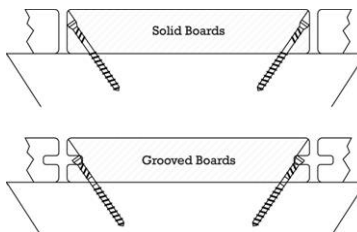

June 2, 2011

Weekes Forest Products Headquartered in St. Paul, Minnesota is Now Proudly Distributing:

RETAILERS LINE UP FOR CAMO FASTENING SYSTEM

Visit camofasteners.com to see the system in action!

Weekes Forest Products, the only authorized distributor of the **CAMO** Fastening System in the Upper Midwest, is excited to report an eager acceptance by retailers and their builders. Retailers have been quick to realize several key advantages in offering out this tool system.

1. They can severely reduce the amount and types of screws and fasteners in their inventory. Carrying the **CAMO** system actually saves them inventory dollars.
2. For approximately the same price as a surface fastened system, their builders can now install a cleaner, better looking, hidden fastened system.
3. ONE fastening system that applies to a wide assortment of deck surfaces, composite, PVC, hardwoods, cedar and treated. Will install grooved or un-grooved product.

According to Bob Hanson, Sales Manager at Weekes Forest Products in St. Paul, "our sales staff has been on the road the last couple of weeks, getting retailers set up with merchandising displays. The acceptance level has been some of the best we have ever seen in a product release. As the Authorized Distributor, the retailer should be sure to make contact with us on **CAMO** for a demonstration, and to make sure they are buying directly from the authorized distributor, Weekes Forest Products, and not a secondary supplier." Bob stresses that everyone interested in the **CAMO** Hidden Fastening System, should review the web site, camofasteners.com. They will quickly see how easy this system works, and why it is so appealing to their deck building clients." Make contact with your Weekes Forest Products representative today, for more information concerning **CAMO** fastening systems.
